ALIAS Lexical Cluster Overlap Analysis Using Cosine Similarity

1

CaseAnalysisID Carole E Chaski PhD--LexiCluster--Freeman Copyright 2014--Stephen M Doniger Esq--1-30-2024**Target Author** Lynne Freeman**Suspect Author** Tracy Wolff**Keyword** accident

The vector space for this keyword lexical cluster for Lynne Freeman and Tracy Wolff is compared to the vector space for this keyword lexical cluster for Lynne Freeman and Baseline Authors using cosine similarity.

SAMENESS

A cosine similarity score of 1 shows that clusters are the same: the LF*TW cluster compared to itself is the same with a cosine similarity score of 1.

DIFFERENCE

A cosine similarity score of 0, close to zero or negative shows that the clusters are different: the LF*TW cluster compared to LF*Baseline Author is always different with a cosine similarity score close to zero or negative.

If all scores are zero, the keyword is not in the tested document(s).

ALIAS Lexical Cluster Overlap Analysis Using Cosine Similarity

24

CaseAnalysisID Carole E Chaski PhD--LexiCluster--Freeman Copyright 2014--Stephen M Doniger Esq--1-30-2024

Target Author Lynne Freeman

Suspect Author Tracy Wolff

Keyword selfish

The vector space for this keyword lexical cluster for Lynne Freeman and Tracy Wolff is compared to the vector space for this keyword lexical cluster for Lynne Freeman and Baseline Authors using cosine similarity.

SAMENESS

A cosine similarity score of 1 shows that clusters are the same: the LF*TW cluster compared to itself is the same with a cosine similarity score of 1.

DIFFERENCE

A cosine similarity score of 0, close to zero or negative shows that the clusters are different: the LF*TW cluster compared to LF*Baseline Author is always different with a cosine similarity score close to zero or negative.

If all scores are zero, the keyword is not in the tested document(s).
